Chemical Purchase Procedure

Antioch College Chemical Purchasing Procedure

Any staff or faculty ordering chemicals for use in Maintenance, Science Labs or Arts Programs must request and receive an MSDS for that chemical prior to receiving the product. This is to ensure that information is available regarding the hazardous nature of the chemical and safe handling procedures that must be followed. A copy of the MSDS must be forwarded to the department supervisor who is responsible for keeping a record of all hazardous chemicals utilized in their departments. If you have any questions or concerns, contact Reggie Stratton, Physical Plant Director and Safety Program Administrator, 937-475-2874.
